

Tadiran Lithium Batteries

PulsesPlus
Batteries

- ▶ High energy
- ▶ Up to 3 A pulse capability
- ▶ Instant voltage response
- ▶ No passivation effect

Type: TLP-91111/A

Performance Data

(Typical values for batteries stored at 25°C for one year)

System	LTC and HLC
Nominal voltage	3.6 V
Nominal capacity	2.4 Ah
Nominal current	2 mA
Max. 1 s pulse to 3 V	3 A
Max. pulse length @ 0.5 A	1000 s
Delay time to 3 V @ 0.5 A	none
Weight	55 g
Temperature range	-40°C ... +85°C
Capacity retention after 10 yr	87%

The battery is designed for applications where low background currents are combined with high current pulses. The **PulsesPlus** battery combines the inherent benefits of bobbin type Lithium Thionyl Chloride (LTC) batteries with a novel hermetically sealed hybrid Layer Capacitor (HLC). The LTC battery contributes high energy density while the HLC contributes high pulse current capability. The overall self discharge is thus minimized while safety is maximized.

Voltage during a Pulse at +25°C

Maximum Pulse Width from 3.6 V to 2.8 V

Pulse Voltage after 1 s

Available Capacity

TLP-91111/A/SM

B = LTC battery
C = HLC
F = PTC (optional)

Both the LTC battery and the HLC are UL recognized.

Any values given here are for informational purpose only. They also depend on actual conditions of use and are not warranties of future performance. Subject to change.

- ▶ Hybrid Layer Capacitor
- ▶ For use in **PulsesPlus** batteries

Voltage during a Pulse at +25°C

Maximum Pulse Width from 3.6 V to 2.8 V

Pulse Voltage after 1 s

Capacity curve at +25°C, 50 mA

General Product Information

Product group: Hybrid Layer Capacitors (HLC)

General Hybrid Layer Capacitors are a kind of rechargeable battery. They are used as a capacitor in **PulsesPlus** batteries, where they are connected in parallel to Tadiran Lithium Batteries. The electrodes of HLC's comprise lithium intercalation compounds. They have low impedance and can deliver high current pulses. The performance and reliability properties of HLC's have been carefully optimized to match those of Tadiran Lithium Batteries. The result is a battery with a maximum of both energy and power density for stand alone use of up to ten years or more.

HLC's are normally charged to 3.6 V, optionally to 3.9 V.

Temperature range

–40 °C ... +85 °C for operation in **PulsesPlus** batteries
–30 °C ... +60 °C for independent storage and use

Electrical characteristics

Discharge end voltage 2.8 V Discharge below 2.5 V at 25 °C and discharge below 2 V at –40 °C may lead to an increase of the internal resistance.

Shelf life	in PulsesPlus batteries	used independently
@ 25 °C	10 years	1 year
@ 60 °C	7 years	4 weeks
@ 85 °C	≥ 1 year	1 week

Cycle life	at 3.6 V	at 3.9 V
to 1 % DOD	400 000 cycles	100 000 cycles
to 10 % DOD	40 000 cycles	10 000 cycles
to 100 % DOD	4 000 cycles	1 000 cycles

(DOD = depth of discharge)

Safety

WARNING HLC's are designed for use in **PulsesPlus** batteries. When used independently, they must not be fast charged.
Overcharge above 3.95 V may lead to capacity loss and/or an increase of internal resistance
Overcharge above 4.4 V may lead to excessive internal pressure. This may result in explosion or rupture.

UL recognition under file MH 12193

Transport

HLC's have passed the UN transport tests. They contain less than 1 g lithium equivalent and are not subject to dangerous goods regulations. They can be transported by air according to IATA DGR, special provision A45 and by rail/road/sea according to RID/ADR/IMDG code, special provision 188.

Any values given here are for informational purpose only. They also depend on actual conditions of use and are not warranties of future performance. Subject to change.

High energy batteries for high current pulses

PulsesPlus batteries are available in a wide variety of configurations (cylindrical and prismatic battery packs). ***PulsesPlus*** batteries feature a primary bobbin type cell and a unique hermetically sealed hybrid layer capacitor, which offers outstanding performance advantages, including:

- ▶ High and stable voltage 3.6 V (optional 3.9 V)
- ▶ High pulse current capability
- ▶ No passivation effect
- ▶ More capacity (up to 19 Ah per D size cell)
- ▶ Wide operating temperature range (-40 °C to + 85 °C)
- ▶ High reliability (hermetic laser sealing, glass-to-metal seal)
- ▶ Outstanding storage capability (up to 10 years)
- ▶ Recognized safety (UL)
- ▶ Very low self discharge (less than 2% per year)

- ▶ extend replacement intervals
- ▶ withstand rough environments
- ▶ are safer than other lithium batteries

PulsesPlus Batteries are ideal for applications requiring long life and high energy under high current pulse requirements.

These applications include:

- ▶ Automotive emergency systems
- ▶ Traffic telematics
- ▶ GPS tracking devices
- ▶ GSM modems
- ▶ Tank level monitoring
- ▶ Pipe line monitoring
- ▶ Oceanographic devices
- ▶ RFID transponders
- ▶ Automatic meter reading
- ▶ Data loggers
- ▶ Security devices
- ▶ Emergency equipment
- ▶ Wireless sensors
- ▶ Defibrillators and
- ▶ Other medical devices.
